EDUCATION

Don Bosco Institute Of Technology

Bachelor Of Engineering in Information Science and Engineering, CGPA 9.02

Bengaluru, India

October 2024 - June 2028

SKILLS SUMMARY

- | | |
|----------------------------|--|
| o Languages: | C++, JavaScript, Java, HTML/CSS, SQL |
| o Frameworks: | ReactJS, Node.js, Express.js, Tailwind CSS |
| o Databases: | MongoDB, MySQL |
| o Others: | DSA, OOPS, DBMS, OS, CN |
| o Tools & Version Control: | Git, GitHub, Visual Studio Code |
| o Soft Skills: | Analytical Thinking, Problem Solving, Communication, Time Management |

PROJECTS

ShopEase – Full-Stack MERN E-commerce Platform | shopease-three-mu.vercel.app

September 2026

Tech Stack: React, Vite, Tailwind CSS, React Router, Node.js, Express, MongoDB Atlas, Mongoose, JWT, Razorpay

- Built a full-stack **MERN e-commerce platform** with a catalog across 6 categories, supporting search, filters (price, rating, brand, stock), sorting and pagination.
- Implemented secure authentication with **JWT access + refresh tokens** in httpOnly cookies, refresh-token rotation with reuse detection, bcrypt hashing, rate limiting and Helmet.
- Built cart and checkout with **Razorpay** payments (HMAC-SHA256 signature verification and webhooks) and cash on delivery.
- Used **MongoDB transactions** to reserve stock so two customers can't buy the last item; a background job cancels unpaid orders after 30 minutes and releases stock.
- Developed an **Admin Dashboard** for product and user management, wrote API tests with Supertest, and deployed on **Vercel** and **Render**.

LearnHub – Online Learning Management System | learnhub-lms-three.vercel.app

September 2026

Tech Stack: React, Vite, React Router, Axios, Node.js, Express, MongoDB, Mongoose, JWT, express-validator

- Built a full-stack **MERN learning platform** with role-based access for **students, instructors and admins**, enforced by server-side role and ownership checks.
- Developed an instructor **course builder** with sections, video lessons, quizzes, reordering and publish/unpublish.
- Enabled students to enroll and learn lesson by lesson with an embedded video player, **server-calculated progress** and resume-where-you-left-off.
- Implemented **auto-graded quizzes** with server-side scoring, pass/fail, answer review and attempt history.
- Designed a layered **REST API** (validation, auth middleware, controllers, services) with MongoDB indexes and aggregations; added integration tests and deployed on **Vercel** and **Render**.

CERTIFICATES

Complete Job-Ready Data Science Course – by Udeemy

Learned data analysis, exploratory data analysis, machine learning fundamentals, and model building using Python.
